BRINGING FASHION BACK INTO SAFETY

A first among the safety eyewear industry, the Armourx Collection combines fashion and unique designs for safety eyewear in the workplace. Armourx was developed by one of Canada's leading eyewear companies. With an extensive background in creating eyewear that is fashion-forward and high in quality craftsmanship, the Armourx Collection is both stylish and functional. Each frame provides standardized eye-protection for the workplace. Look stylish and feel comfortable in Armourx's individual collections from Wrap-Rx and Metro to Classic and Basic.

THIRD-PARTY TESTING

For peace of mind, all Armourx frames are third-party tested.

SIDE SHIELD PROTECTION

Side Shields - We've got you covered!

To protect your eyes from workplace hazards, side shields are available for all Armourx frames.

Armourx side shields are:

- Tested per ANSI and CSA standards
- Impact resistant
- Resistant to lens cleaning chemicals
- Durable - will not crack or craze over time

Side shields for Armourx frames are available in both removable and permanently attached configurations.

Removable side shields are ordered as a separate accessory and each side shield is designed to fit the specific frame. Permanently attached side shields are attached using two different methods depending on the temple material. Frames with metal temples have side shields permanently moulded onto the temple.* Frames with plastic temples use a decorative rivet to permanently attach the side shields. Both configurations of permanent side shields are attached at the factory, so you won't have to worry about extra little parts needed or riveting. **No assembly required!**

Your eyes are important. Protect them!

Removable

Permanent for Metal Temples - Molded
(Side shield is fused to the temple)

Permanent for Plastic Temples -Riveted

*Model 7011P uses riveted side shields.
